# ***CITY OF FOND DU LAC - Memorandum***

---

**City Manager**

**To:** City Council

**From:** Joseph P. Moore, City Manager

**Date:** August 27, 2021

**Subject:** 2022-2026 Capital Improvement Plan

## **Introduction**

With this memo is your copy of the proposed 2022-2026 Capital Improvement Plan (CIP). A Capital Improvement Plan is a statement of intent by City officials to establish a multi-year program for major capital expenditures and the financial resources necessary to accomplish the plan. A Capital Improvement Plan is a flexible planning tool designed to be altered annually as conditions warrant.

A multi-year capital improvement plan provides a long-range viewpoint for the community to identify needed projects and expenditures, selects those projects deemed most important in comparison to all others (priorities), determines when such projects should occur and anticipates the impact such expenditures will have on the community and its financial condition.

Some of the benefits of developing a long-range capital improvement plan are that it:

1. Provides a stable tax rate which allows taxpayers and the city government to plan more effectively;
2. Provides adequate time to plan and coordinate construction projects and eliminate costly duplication of efforts;
3. Provides adequate time to search for alternate methods of financing, including debt issues and grants-in-aid;
4. Provides time to acquire land and right-of-way where needed;
5. Allows time for communication and public input regarding future project plans for the community;
6. Reduces spur-of-the-moment decisions; and
7. Assists in planning efforts of other public utilities, agencies, and businesses.

The City defines capital expenditures as projects which cost more than \$25,000 and have a life expectancy of more than six years. Projects are evaluated and priorities are assigned based upon demand or usage, prior commitments, age and condition of facilities and equipment, and costs versus benefits. Priorities are subject to change as conditions warrant.

This plan does not authorize any expenditure, but does provide a plan of capital expenditures for the development of each year's budget.

### **Capital Financing Philosophies and Debt Levels**

There are two major philosophies used in the financing of long-term capital projects: the "pay-as-you-go" and the "pay-as-you-use" philosophies.

The "pay-as-you-go" philosophy is based upon financing capital projects with current revenues and property tax levies or accumulated resources. Under this financing method the community can save on interest costs by avoiding debt issues.

The "pay-as-you-use" philosophy is based upon debt financing of capital improvements. Under this philosophy, those citizens paying for the projects use them while they are paying for them. An example would be a major street construction project which is financed by issuing debt. The citizens who use the street in the future pay the property taxes needed to repay the debt.

### **2022-2026 Capital Projects Overview**

Total capital projects for all funds vary by year and range from a low of \$16.3 million in 2024 to a high of \$53.7 million in 2026. Details of the individual projects, their timing as well as the funding sources for the projects are listed on the projects detail pages for each department by year. Some of the more significant 2022 projects include:

- Lincoln & Thomas Pump Station Upgrade - \$6,200,000
- Military Road–Superior to Western: Street, Sanitary Sewer & Water - \$4,030,000 (DOT Project)
- Police Department building renovations - \$1,813,000
- Wastewater Utility annual clear water elimination program - \$1,800,000
- Wastewater Utility biosolids dryer - \$1,700,000
- County Hwy VV (Pioneer Road) in conjunction with Fond du Lac County - \$1,442,000
- Street Maintenance & Reconstruction - \$1,405,000
- Water Utility annual main replacement program - \$1,141,125
- Transit bus replacement - \$940,000
- Public Works annual capital equipment replacements - \$802,000
- Annual street restoration-utility repair projects - \$685,000

### **2022 Projects Funded by General Operating Funds**

This 5-year plan continues to invest a significant amount of operating revenues rather than long-term debt on CIP projects. These revenues include items levied for directly in the capital project funds and items for which the capital projects funds receives operating transfers from other funds. This funding amount is \$1,790,448 for 2022 and will average \$1.9 million each year of this 5-year CIP.

A review of the projects funded by operations will show that they are either maintenance-type expenditures or annually recurring projects where the City spends similar amounts on these types of projects every year. It is good financial practice to fund such projects on a “pay-as-you-go” basis with operating funds, if possible, rather than funding these projects with long-term debt. The changes made in the last few years’ CIPs return the City to its former, more financially sound, practice of funding its annually recurring projects on a pay-as-you-go basis.

Another benefit of funding the annually recurring projects with operating funds rather than long-term debt is that the amount of money the City borrows in future years is reduced. Not only will the City have a lower amount of outstanding debt in future years, but its future debt payments and property tax levies required to pay debt principal and interest will be lower than they otherwise would have been if the City continued its practice of borrowing for its annually recurring capital projects.

In April, 2021, voters approved a Public Safety Referendum to allow the City to exceed tax levy limits in order to hire and equip 6 firefighter/paramedics and 6 patrol officers. Included in the Referendum was \$165,697 for the purchase of 2 additional squad cars to help equip the 6 additional patrol officers. This resulted in the 2022 Squad Replacement Program being higher than the normal yearly average. Fire/Rescue has sufficient apparatus to equip the 6 additional firefighter/paramedics due to having reserve ambulances in the fleet.

A detailed schedule listing all projects funded by operations is included in this report.

### **2021 Projects Funded by Long-Term Debt**

The total amount of 2022 projects to be funded by general obligation (G.O.) long-term debt is \$15,826,500. A detailed schedule listing the projects funded by general obligation long-term debt is included in this report.

Public Works capital improvement plan for 2022 includes a continued increase in funding for street maintenance projects throughout the city, in order to extend the linear miles repaired, with an emphasis on the lowest rated pavements. The amount increased from \$270,000 in 2019 to \$820,000 in 2022. The additional money will allow for significantly more chip sealing or overlay projects to be completed than had been normally scheduled.

This will be achieved by relying more heavily on debt funded public works projects rather than limiting the funding to what could be supported from within the operational budget, which to this point has been our policy. In summary, public works projects that are forecasted to have a useful life of 10 years or more will be eligible for debt funding. The 10 year guideline is used because debt is issued with a 10 year repayment schedule. By relying more heavily on debt funding, there is no savings to the taxpayer, but this change provides the opportunity to improve the quality and extend the life of our street pavements more quickly than prior years. By relying less on operations funding, the levy limit effect as it pertains to street maintenance has been reduced, but the increased reliance on debt will increase the levy nonetheless.

In the 2023 CIP is \$1,300,000 in funding for a bridge from Lakeside Park East to Lakeside Park West. Upon reflection, City staff doesn’t see the bridge project being viable given the recent direction of Lakeside Park. However, since the City Council voted to add the bridge to the 2021-2025 CIP on September 9, 2020, the project still remains in the 2022-2026 CIP for further discussion and action by Council.

The Lincoln and Thomas Street Pump Station Upgrade saw a significant cost increase from \$3,700,000 in the 2021-2025 CIP to \$6,200,000 in the 2022-2026 CIP. As the design has been progressing, the engineer has found new complexities and risk factors that have caused the estimate to increase substantially.

Included in the 2022-2026 CIP is \$2,732,000 in renovations for the Police Department. The building was purchased from Alliant Energy in 2001 and minimal investment has been made in reconfiguring the building. As the policing has grown and changed over the years, it has become evident that the building requires significant renovations. Locker rooms are no longer adequate to accommodate the increase in female officers. Accreditation standards have required the need for expanded and more secured evidence handling, processing and storage areas. HVAC systems have been maintained over the years, but are reaching the end of their useful lives given the needs and usage of the building.

### **Repayment Term for New G.O. Debt**

The G.O. debt that the City issues to fund general capital projects in 2022 will be issued for a term of 10 years. In 2014 the City implemented a policy that returned to the pre-2007 10-year term from 20-year terms, this fiscally sound debt management practice results in a close matching of debt repayment terms with the useful lives of the assets acquired with the debt.

### **Decreasing G.O. Debt Balances**

Appendix A is a projection of the outstanding G.O. debt balances through 2026. Existing debt, new debt and total debt balances are indicated on the chart. The projections indicate that even with the new debt issued for the capital projects contained in the 2022-2026 CIP, the G.O. debt balance will remain fairly consistent. The G.O. debt balance ranges from a low of \$87.1 million in 2025 to a high of \$91.3 million in 2023, with the average debt balance from 2022-2026 at \$89 million.

Consistent with past City Council policy, 60% of the State legal debt limit is used as the limiting goal in developing future capital expenditure plans. The State legal debt limit is 5% of the equalized valuation of taxable property. As shown in Appendix D, the City's projected debt levels are at 53.4% in 2022, and projected to drop to 48.1% by 2026.

### **Increasing G.O. Debt Payments**

Appendix B is a projection of G.O. debt payments through 2026. Existing debt, new debt and total debt payments are indicated on the chart. Total G.O. debt payments are projected to increase each year over the next five years by a total of \$1,595,000.

### **Increasing Property Tax Levy**

A major consideration in developing the Capital Improvement Plan is the impact the proposed projects will have on future property tax rates. The City's property tax levy is subject to strict State-imposed levy limits. Under the levy limit, the City's property tax levy is allowed to increase by no more than the growth in property value due to net new construction, which is 1.43% for 2022. The levy limit is further allowed to increase by the amount of increases in general obligation debt principal and interest payments.

The property tax rate projections indicated in Appendix C show that scheduled increasing debt payments will require increases in the portion of the property tax levy needed for debt service, and the total property tax levy over the next several years. The chart further indicates that the portion of the property tax for operating costs is virtually unchanged over the next several years. The increases in the tax rates are due almost entirely to required increases in the debt payment portion of the tax levy.

### **2022 Utility Projects**

The 2022 CIP includes \$4,690,000 in Wastewater Utility projects and \$3,891,625 in Water Utility projects. Wastewater Utility's biosolids dryer project of \$1,700,000 will be funded by debt, while the remainder of Wastewater Utility projects will be funded by operating funds. The Water Utility will fund \$3,003,625 in a variety of street reconstruction projects with debt, with all other Water Utility projects funded by utility operating funds. No general taxpayer money is used to support utility operations, utility capital projects or utility debt payments.

### **Utility Debt Balances**

Appendix E indicates that the Water Utility debt balances drop from \$28.9 million in 2022 to \$26.9 million by 2026. Appendix F indicates that the net debt balances for the Wastewater Utility increase from \$20.2 million in 2022 to \$50.9 million by 2026, due primarily to significant upcoming project costs related to mandated phosphorous removal and compliance.

### **Future Capital Projects**

Appendix G contains a list of the larger known future capital projects that are beyond the five-year time frame of the 2022-2026 capital improvement plan.

Capital Projects Detail Overview  
For the Years 2022 through 2026**

	2022	2023	2024	2025	2026
<b>Wastewater Treatment &amp; Resource Recovery:</b>					
Capital Equipment Replacement	\$ 75,000	\$ 25,000	\$ 37,000	\$ 37,000	\$ 350,000
Annual Clearwater Elimination	1,800,000	2,200,000	2,300,000	2,300,000	2,400,000
14th St Private Clearwater Pilot Project	400,000	-	-	-	-
Sanitary Flow Meter Replacement	35,000	35,000	-	-	-
Military Road - Sanitary Sewer Relay - Superior to Western	630,000	-	-	-	-
W Division St Bridge Sanitary Adjustment	-	15,000	-	-	-
Pioneer Rd Sanitary Adjustments	50,000	50,000	125,000	100,000	100,000
West Scott Street - Sanitary Sewer Relay	-	-	-	-	950,000
Biosolids Dryer	1,700,000	10,650,000	-	-	-
Biogas Utilization - Pipeline Injection	-	-	1,600,000	5,040,000	-
Mixed Liquor Splitter Structure Modification	-	-	-	1,655,000	-
<b>Phosphorus Compliance</b>					
Water Quality Trading	-	340,000	340,000	545,000	430,000
Excess Flow Rehab	-	-	150,000	4,300,000	-
Headworks Pump Upgrades	-	-	-	280,000	4,010,000
Filters	-	-	-	700,000	10,200,000
EQ Storage Tank	-	-	-	960,000	13,770,000
<b>Total WTRRF</b>	<b>\$ 4,690,000</b>	<b>\$ 13,315,000</b>	<b>\$ 4,552,000</b>	<b>\$ 15,917,000</b>	<b>\$ 32,210,000</b>
<b>Water Utility:</b>					
Capital Equipment Replacement	\$ 203,000	\$ 135,000	\$ 120,000	\$ 100,000	\$ 70,000
Annual Water Meter Additions & Replacements	80,000	80,000	80,000	80,000	80,000
Annual 4-inch Main Replacement - City Wide	175,000	175,000	175,000	175,000	175,000
Annual Well Renovation & Pump Work	330,000	340,000	340,000	350,000	350,000
Annual Emergency Well Reserve	100,000	100,000	100,000	100,000	100,000
Annual Clearwater Elimination - Main Replacement	1,141,125	1,318,000	1,371,750	1,355,750	1,125,350
<b>Stand Alone Projects</b>					
Trowbridge GSR Painting & Overflow Modification (3.0 MG)	150,000	-	-	-	-
NE GSR Roof & Overflow Modification (0.5MG)	30,000	130,000	-	-	-
Southview Acres Water Main Loop-Springs to Morningside	15,000	280,000	-	-	-
Martin Tower Painting (0.5 MG)	-	45,000	450,000	-	-
Trowbridge Backflow Upgrade	-	-	30,000	200,000	-
Montana Street	-	-	-	220,000	-
N Hickory St - Scott to Dead End	-	-	-	-	190,000
Advanced Metering Infrastructure Upgrade	-	-	-	-	3,500,000
Fond du Lac Ave to South Country Lane Loop	-	-	-	-	704,000
E Division St to Wisconsin American Drive Loop	-	-	-	-	638,000
