

American Rescue Plan Act

APPROVED SPENDING PLAN

2022-2024

CITY OF FOND DU LAC - Memorandum

City Manager

To: City Council

From: Joseph P. Moore, City Manager

Date: November 9, 2022

Subject: 2022-2024 American Rescue Plan Act (ARPA) Spending

On March 11, 2021, the American Rescue Plan Act (ARPA) was signed into law by the President. ARPA provided \$1.9 trillion in economic stimulus funds to aid the recovery from the COVID-19 pandemic, with \$350 billion in aid for state, local and Tribal governments across the country to support their response to and recover from the pandemic. The funds are meant to ensure that governments have the resources needed to maintain vital public services and build a strong, resilient, and equitable recovery by making investments that support long-term growth and opportunity. The City received a total of \$13,792,153 in ARPA funding in two tranches – one received in May 2021 and one in May 2022.

Implementation and oversight of ARPA funds lies with the US Department of the Treasury. Treasury was responsible for distributing funding to state, local and Tribal governments as well as developing eligible spending categories, reporting guidelines and compliance guidelines, commonly known as the Final Rule. At a high level, Final Rule guidelines include:

- Funds need to be committed by December 31, 2024. Committed means order placed, contract awarded or sub-award made.
- Funds need to be expended by December 31, 2026. Expended means invoices received and payment made.
- Funds cannot be spent on deposits into pension funds, payment of debt service, satisfying a judgment or settlement, or contributing to a “rainy day” account or directly increase fund balance.
- Four separate eligible use categories: continuation of providing government services due to lost revenues, support the COVID-19 public health and economic response, provide premium pay for eligible workers and invest in water, sewer and broadband infrastructure.

One of the guiding principles of the Final Rule is to consider the ability to support long-term operating costs on any new programs or services once ARPA funds are exhausted. The City ARPA project plan focuses on one-time project opportunities that enhance and strengthen our mission and the services we currently provide, with special emphasis placed upon projects within the City’s Qualified Census Tract (QCT). A QCT is a common, readily-accessible and geographically granular method of identifying areas of a community with a large portion of low-income residents.

By allocating ARPA funding to one-project expenditures, the city will avoid operational funding cliffs. Funding cliffs are created when funding for an activity ends abruptly.

With ARPA we endeavor to avoid creating and funding recurring operating expenditures that are funded by non-recurring revenues. We avoid that because when the revenues are exhausted the operating expenditure becomes unfunded, thus unsustainable.

When the first tranche of ARPA funds was received, the City formed an internal team to identify projects, determine funding levels to complete and prioritize the project list. Citizen feedback on the project list was obtained via an on-line survey.

2022 Project Highlights

The following are highlights of City Council-supported projects that were identified in late 2021 and early 2022 and are currently underway:

- Plamore Park inclusive playground - \$1,000,000. In conjunction with the Brooke Industries and Miracle League project to build an inclusive baseball diamond at Plamore Park, ARPA funds were allocated to enhance the features at Plamore Park to include an inclusive playground. Initial site-work began in October, with completion of the baseball diamond, concessions stand and playground targeted for June, 2023.
- Catalytic Downtown Historic Project - \$800,000. Funds were allocated to assist with the revitalization of a historic downtown property. Rehabilitation is slated to begin late 2022 with completion in 2023.
- Hamilton Park Improvements - \$605,000. Bids for the construction of restroom facilities are expected to be issued by the end of 2022. After construction is complete, additional enhancements include gateway improvements to Forest Ave. and Macy St., replacement of benches, adding a shade structure near the playground, adding a water feature, and installation of a multi-sport court.
- Franklin Park Improvements - \$250,000. New fencing, a mural and a new playground structure were installed over the summer and early fall. An interactive water feature will be designed and installed in 2023.

2023 & 2024 Project Highlights

Due to competing priorities for financial resources, often times projects are relegated to lower status on the priority list. The projects are identified as essential to the continuation of providing high quality municipal services, but may not rise as high in priority as other projects. With a guiding principle of using ARPA funds to focus on one-time project opportunities, included in this book are a list of projects that have been identified as meeting those criteria. Highlights are:

- McDermott Park - \$420,000. At the City Council meeting on September 21, 2022, City Council added funding for three projects in McDermott Park. \$200,000 was added for a synthetic ice rink, \$200,000 for landscaping improvements and \$20,000 for enhancing pedestrian safety for those crossing Johnson Street to access McDermott Park.
- Utility Street Reconstruction in QCT - \$1,500,000. Increase in annual utility street reconstruction program to focus on streets located within the QCT. Work would include water, sanitary sewer, storm sewer and street reconstruction.
- Water and Wastewater Pump Station Security Upgrades - \$700,000. To ensure outlying pump stations are secure, funding is needed to improve security cameras, access controls and monitoring equipment.
- Private Inflow & Infiltration (I/I) Reduction - \$500,000. Working with the QCT, project details include, but are not limited to, sanitary later replacement into the home, roof drain

redirection to the storm system, sump pump installation and hard piping from sump pump to storm mainline. These upgrades would be completed with the intent of no cost to the property owner.

- Replace Private Lead Water Services - \$500,000. Working in conjunction with the Private I/I Reduction program, funding would target households in the QCT that also have lead water services on the private side. The project would mirror the Water Utility's current lead service replacement program, with the intent to be at no cost to the property owner.
- Water Distribution System Redundancy - \$1,000,000. Currently two areas of the City do not have redundancy built into the water distribution network. This funding would allow for that redundancy to ensure continued water supply for growing areas of the city.
- Security Information Event Management (SIEM) - \$496,000. Cyber security and threats are an ever-changing landscape, and it's important to have a tool that can adapt. The purchase of SIEM software and monitoring provides identification of potential security issues such as failed logins, malware activity or other malicious activity. It makes it easier to manage security by filtering massive amounts of security data for known and unknown threats, and by prioritizing any security alerts received. SIEM enables detection of incidents that may otherwise go undetected, resulting in a more secure network.

As you will see, the entirety of the City's ARPA dollars have not yet been allocated. This allows flexibility for funding project opportunities that may present themselves during the remainder of 2022, in 2023 or early in 2024. Staff will continue to identify projects that would meet the ARPA requirements and present to City Council for consideration.

Joseph P. Moore
City Manager

RESOLUTION NO. 9031

A RESOLUTION APPROVING THE PROPOSED PROJECTS AND AMERICAN RESCUE PLAN ACT (ARPA) SPENDING PLAN

WHEREAS, the City Council has reviewed the proposed projects and ARPA Spending Plan that has been presented for the three-year obligation period from 2022 through 2024; and

WHEREAS, the City Council has expressed support for 2022 and 2023 projects listed in the ARPA Spending Plan and those projects are in various stages of implementation and development; and

WHEREAS, ARPA funding needs to be fully obligated by December 31st, 2024 and the ARPA Spending Plan identifies projects for 2024 to assist fulfilling that requirement; and

WHEREAS, the entirety of the City's ARPA funding has not been fully allocated and additional projects may be identified as opportunities arise at which time City staff would present to City Council for consideration.

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Fond du Lac hereby approves the proposed projects and spending authorities listed in the American Rescue Plan Act Proposed Spending Plan.

ADOPTED:

NOV 09 2022

Patrick Mullen, President
Fond du Lac City Council

Attest:

Margaret Hefter, City Clerk

City Attorney:
