

## **Printing Instructions**

When you open the document containing the City of Fond du Lac Comprehensive Plan, you will notice that some of the maps and tables are either legal or tabloid size. To print the entire document on 8.5 by 11 inch paper, make sure you have the following settings in the Print dialog box:

In the Page Handling section, Page Scaling should be set to **Fit to Printer Margins** and the **Auto-Rotate and Center** box should be checked.

The document has been formatted to print either one or two-sided. With either choice, blank pages have been inserted for the purpose of two-sided printing.

To print maps in color and at full scale as drawn, each map should be printed separately because of the variety of paper sizes.
