

Due by March 31, 2013

Notice: Pursuant to s. NR 216.07(8), Wis. Adm. Code, an owner or operator of a Municipal Separate Storm Sewer System (MS4) is required to submit an annual report to the Department of Natural Resources (DNR) by March 31 of each year to report on activities for the previous calendar year. This form is being provided by the DNR for the user's convenience. Personal information collected will be used for administrative purposes and may be provided to the extent required by Wisconsin's Open Records Law [ss. 19.31-19.39, Wis. Stats.].

This form is for reporting on activities undertaken in calendar year 2012.

Instructions: Complete each section of the form that follows. If additional space is needed to respond to a question, attach additional pages. Provide descriptions that explain the program actions taken to comply with the general permit. Complete and submit the annual report by March 31, 2013, to the appropriate address indicated on the last page of this form.

SECTION I. Municipal Information			
Name of Municipality City of Fond du Lac		Facility ID No. (FIN) 31070	
Mailing Address P.O. Box 150	City Fond du Lac	State WI	ZIP Code 54936
County(s) in which Municipality is located Fond Du Lac	Municipality Type: (select one) <input type="radio"/> County <input checked="" type="radio"/> City <input type="radio"/> Village <input type="radio"/> Town <input type="radio"/> Other (specify)		

SECTION II. Municipal Contact Information			
Name of Municipal Contact Person Nick Waldschmidt		Title Civil Engineer II	
Mailing Address P.O. Box 150	City Fond du Lac	State WI	ZIP Code 54936
Email nwaldschmidt@fdl.wi.gov	Phone Number (include area code) (920) 322-3482	Fax Number (include area code) (920) 322-3471	

SECTION III. Certification		
<i>I hereby certify that I am an authorized representative of the municipality covered under MS4 General Permit No. WI-S050075-1 for which this annual report is being submitted and that the information contained in this document and all attachments were gathered and prepared under my direction or supervision. Based on my inquiry of the person or persons under my direction or supervision involved in the preparation of this document, to the best of my knowledge, the information is true, accurate, and complete. I further certify that the municipality's governing body or delegated representatives have reviewed or been apprised of the contents of this annual report. I understand that Wisconsin law provides severe penalties for submitting false information.</i>		
Authorized Representative Printed Name Paul DeVries	Authorized Representative Title City Engineer/Deputy Director of Public Works	
Signature of Authorized Representative	Date 03/28/2013	
Email pdevries@fdl.wi.gov	Phone Number (include area code) (920) 322-3473	Fax Number (include area code) (920) 322-3471

SECTION IV. General Information		
<p>a. Describe what efforts the municipality has undertaken to invite the municipal governing body, interest groups, and the general public to review and comment on the annual report.</p> <p>The annual report will be sent to the City Council via the weekly "Council Communications" report from staff to Council. The annual report will be posted on our website and will be available for viewing at the City County Government Center.</p>		
<p>b. Describe how elected and municipal officials and appropriate staff have been kept apprised of the municipal storm water discharge permit and its requirements.</p> <p>The city had a consultant develop a storm water management plan to address the section 2.7 of the permit. The plan was given to City Council members and appropriate staff. The plan was updated in 2011 and the results presented to the City Council members and appropriate staff. The presentation also included an overview of the municipal storm water discharge permit requirements and what has been accomplished to date. The City of Fond du Lac department leaders hold weekly meetings where permit requirements are discussed as necessary. The City of Fond du Lac Public Works Department divisions leaders also hold weekly meetings where permit requirements are discussed as necessary.</p>		

SECTION IV. General Information (continued)

c. Has the municipality prepared its own municipal-wide storm water management plan? Yes No

If yes, title and date of storm water management plan:

"Citywide Stormwater Management Plan and Ordinance Development City of Fond du Lac" June 2006
"City of Fond du Lac Citywide Stormwater Management Plan Update" April 2011

d. Has the municipality entered into a written agreement with another municipality or a contract with another entity to perform one or more of the conditions of the general permit as provided under Section 2.10 of the general permit? Yes No

If yes, describe these cooperative efforts:

e. Does the municipality have an internet website? Yes No

If yes, provide web address:

<http://www.fdl.wi.gov/>

If the municipality has an internet website, is there current information about or links provided to the MS4 general permit and/or the municipality's storm water management program? Yes No

If yes, provide web address:

<http://www.fdl.wi.gov/departments.Impl?DeptID=12&DeptPage=38>

SECTION V. Permit Conditions

a. **Minimum Control Measures:** For each of the permit conditions listed below, provide a description of the status of implementation of program elements, the status of meeting measurable goals, and compliance with permit schedule in section 3 of the MS4 general permit. Provide an evaluation of program compliance with the general permit, the appropriateness of identified best management practices, and progress towards achieving identified measurable goals. Be specific in describing the actions that have been taken during the reporting year to implement each permit condition and whether measurable goals have been met, including any data collected to document a measurable goal. Also, explain the reasons for any variations from the compliance schedule in the MS4 general permit.

- Public Education and Outreach

See attached. The entire text does not fit in the form field.

- Public Involvement and Participation

The 2011 annual report was placed on the city's website.

The city assisted the Fond du Lac County Land and Water Conservation Dept. with a storm drain stenciling project and an annual river clean up throughout the city. The clean up also included some city-owned storm water ponds. The clean up and stenciling took place April 28, 2012.

The city assisted the Fond du Lac County Land and Water Conservation Dept. and Marian University with a storm drain stenciling project on August 17, 2012. The storm drain stenciling included 20 volunteers and took place in the west-central portion of the city.

The city assisted Fond du Lac County Land and Water Conservation Dept. and UW-FDL with a storm drain stenciling project on November 5, 2012. The storm drain stenciling included 4 volunteers and took place in the west-central portion of the city.

SECTION V. Permit Conditions (continued)

• Illicit Discharge Detection and Elimination

The city adopted an illicit discharge detection and elimination ordinance on August 12, 2009. The city hired a consultant to perform the outfall screening for 2012. In 2012, a total of 101 outfalls were screened for potential illicit discharges, including four outfalls that were rescreened due to potential illicit discharges in 2011. The inspections consisted of a visual screening along with a chemical analysis of dry-weather flow that was present. The inspections revealed seven outfalls with evidence of potential illicit discharges. In the cases where illicit discharge indicators were found, additional inspection, sampling, televising sewers, or other measures were performed to locate the source of the illicit discharge as appropriate.

The city also responded to several illicit discharge complaints. The investigation into one of the illicit discharge incidents is ongoing. The other incidents were generally determined to be one time discharges.

• Construction Site Pollutant Control

The city adopted a construction site pollutant control ordinance at the City Council meeting on September 10, 2008. Details on site inspections and enforcement actions can be found in Section VII e below.

• Post-Construction Storm Water Management

The city adopted a post-construction storm water management ordinance at the City Council meeting on September 10, 2008. The city has developed maintenance logs for property owners to document ongoing inspection and maintenance of storm water management facilities.

• Pollution Prevention

See attached. The entire text does not fit in the form field.

b. Storm Water Quality Management: Has the municipality completed a pollutant-loading analysis to assess compliance with the 20% TSS reduction developed urban area performance standard? Yes No

If yes, provide the following: Model used SLAMM Version 9.4 Reduction (%) 42.8

If no, include a description of any actions the municipality has undertaken during 2012 to help achieve the 20% standard.

Has the municipality completed an evaluation of all municipal owned or operated structural flood control facilities to determine the feasibility of retrofitting to increase TSS removal? Yes No

If yes, describe:

The report "City of Fond du Lac Citywide Stormwater Management Plan Update" evaluated municipally owned or operated structural flood control facilities to determine the feasibility of retrofitting to increase TSS removal.

c. Best Management Practices Maintenance: Does the municipality have a maintenance program for installed storm water best management practices? Yes No

If yes, describe the maintenance program and any maintenance activities that have occurred for best management practices in 2012. If available, attach any additional information on the maintenance program.

The city inspects all storm water management facilities owned by the city annually. Sediment depth checks on wet detention ponds are performed less frequently than annually based on factors such as the age of the facility and previous test results. Best management practice maintenance is performed as necessary. Storm water pump station sumps are inspected annually and cleaned as necessary. Additional information on best management practices maintenance can be found in the pollution prevention section of this report.

The city requires a long-term storm water management maintenance agreement which is recorded at the Fond du Lac County Register of Deeds for all privately owned best management practices. The maintenance agreement requires the owner to inspect and maintain best management practices. The city has not previously required the owner to submit copies inspection and maintenance records.

d. Storm Sewer System Map: Describe any changes or updates to the storm sewer system map made in the reporting year. Provide an updated map if any changes occurred during the reporting year.

The map has not been updated.

SECTION VI. Fiscal Analysis

a. Provide a fiscal analysis that includes the annual expenditures for 2012, and the budget for 2012 and 2013. A table to document fiscal information is provided on page 6.

b. What financing/fiscal strategy has the municipality implemented to finance the requirements of the general permit?

Storm water utility General fund Other Permit review fees

c. Are adequate revenues being generated to implement your storm water management program to meet the permit requirements? Yes No

Please provide a brief summary of your financing/fiscal strategy and any additional information that will assist the Department in understanding how storm water management funds are being generated to implement and administer your storm water management program.

Storm water management work is funded entirely by the tax levy, with the levy caps the city is finding it very difficult to come up with money to fund the storm water management improvements and program activities.

SECTION VII. Inspections and Enforcement Actions

Note: If an ordinance listed below has previously been submitted and has not been amended since that time, a copy does not need to be submitted again. If the ordinance was previously submitted, indicate such in the space provided.

a. As of the date of this annual report, has the municipality adopted a construction site pollutant control ordinance in accordance with subsection 2.4.1 of the general permit? Yes No If yes, attach copy or provide web link to ordinance:

The ordinance can be found at <http://www.fdl.wi.gov/departments.iml?DeptID=6&DeptPage=83>.

b. As of the date of this annual report, has the municipality adopted a post-construction storm water management ordinance in accordance with subsection 2.5.1 of the general permit? Yes No If yes, attach copy or provide web link to ordinance:

The ordinance can be found at <http://www.fdl.wi.gov/departments.iml?DeptID=6&DeptPage=83>.

c. As of the date of this annual report, has the municipality adopted an illicit discharge detection and elimination ordinance in accordance with subsection 2.3.1 of the general permit? Yes No If yes, attach copy or provide web link to ordinance:

The ordinance can be found at <http://www.fdl.wi.gov/departments.iml?DeptID=6&DeptPage=83>.

d. As of the date of this annual report, has the municipality adopted any other ordinances it has deemed necessary to implement a program under the general permit (e.g., pet waste ordinance, leaf management/yard waste ordinance, parking restrictions for street cleaning, etc.)? Yes No If yes, attach copy or provide web link to ordinance:

e. Provide a summary of available information on the number and nature of inspections and enforcement actions conducted during the reporting period to ensure compliance with the ordinances described in a. to d. above.

There were 21 commercial, industrial and multifamily residential sites and two City of Fond du Lac construction sites which began in 2012. There were 20 construction sites which began in earlier years but were still active in 2012. Sites are generally inspected upon installation of erosion and sediment control measures and once per month during the spring, summer and fall. Erosion and sediment control inspections are performed weekly on municipal projects. A total of 313 inspections, excluding 1&2 family residential construction, were performed in 2012.

Non-compliant sites were given written and/or verbal warnings to comply with their permit requirements and follow up inspections were performed. There was a total of 53 enforcement actions during 2012.

The city requires that upon completion of a storm water management facility an as-built plan be submitted verifying that the storm water management facility has been constructed in accordance with the approved plans.

SECTION VIII. Water Quality Concerns

a. Does any part of the MS4 discharge to an outstanding resource water (ORW) or exceptional resource water (ERW) listed under s. NR 102.10 or 102.11, Wis. Adm. Code? (A list of ORWs and ERWs may be found on the Department's Internet site at: <http://dnr.wi.gov/topic/SurfaceWater/orwerw.html>) Yes No If yes, list:

SECTION VIII. Water Quality Concerns (continued)

b. Does any part of the MS4 discharge to an impaired waterbody listed in accordance with section 303(d)(1) of the federal Clean Water Act, 33 USC § 1313(d)(1)(C)? (A list of the most current Wisconsin impaired waterbodies may be found on the Department's Internet site at: <http://dnr.wi.gov/water/impairedsearch.aspx?status=303d>) Yes No If yes, complete the following:

- Impaired waterbody to which the MS4 discharges:
Fond du Lac River

- Description of actions municipality has taken to comply with section 1.5.2 of the MS4 general permit for discharges of pollutant(s) of concern to an impaired waterbody:
The city completed construction of the Galloway storm water quality pond and the Fairgrounds storm water quality pond to remove pollutants from storm water discharges.

c. Identify any known water quality improvements in the receiving water to which the MS4 discharges during the reporting period.
There are no known water quality improvements in the receiving water during the reporting period.

d. Identify any known water quality degradation in the receiving water to which the MS4 discharges during the reporting period and what actions are being taken to improve the water quality in the receiving water.
The Fond du Lac River was added to the 303d list for total phosphorus. The city completed construction of the Galloway storm water quality pond and the Fairgrounds storm water quality pond to remove pollutants from storm water discharges.

SECTION IX. Proposed Program Changes

Describe any proposed changes to the storm water management program being contemplated by the municipality for 2013 and the schedule for implementing those changes. Proposed program changes must be consistent with the requirements of the general permit.

There are no proposed changes to the storm water management program being contemplated for 2013.

Fiscal Analysis Table. Complete the fiscal analysis table provided below.

Program Element	Annual Expenditure 2012	Budget		Source of Funds
		2012	2013	
Public Education and Outreach	15,000	15,000	15,000	Tax levy
Public Involvement and Participation	7,000	7,000	7,000	Tax levy
Illicit Discharge Detection and Elimination	25,000	25,000	25,000	Tax levy
Construction Site Pollutant Control	20,000	20,000	20,000	Tax levy
Post-Construction Storm Water Management	15,000	15,000	15,000	Tax levy
Pollution Prevention	100,000	100,000	100,000	Tax levy
Storm Water Quality Management (including pollutant-loading analysis)	460,337	370,000	0	Tax levy
Storm Sewer System Map	15,000	15,000	15,000	Tax levy
Other: NEWSC membership fee	2,500	2,500	2,500	Tax levy

ADDENDUM

Section V. Permit Conditions

Public Education and Outreach

The city is an active member of the Northeast Wisconsin Stormwater Consortium (NEWSC). An annual report covering the activities undertaken by NEWSC has been submitted to the DNR separately.

The city maintains a website with content relating to storm water management. The city website also links to a storm water public education website, <http://www.renewourwaters.org>, which was developed by NEWSC.

Storm sewer catch basins on city projects have the message "Dump No Waste - Drains to Lake" and a double fish logo cast into the top of the curb box.

The city has developed storm water public education signs to be placed at the four most publically accessible storm water detention ponds.

There is a storm water education poster placed at the City Engineering office visible to members of the public. A "Renew Our Waters" poster was placed at the City Engineering office. A "Renew Our Waters" banner was placed in the lobby of the Fond du Lac City-County Government Center.

The city has developed a reference guide for the erosion control and storm water management ordinances to help developers and their consultants understand the city's erosion control and storm water management regulations and understand the regulatory process. The reference guide is available on the city's website.

All construction projects covered by the erosion control ordinance are required to post a permit onsite. The permit provides the public with information regarding the requirement to install and maintain erosion control practices and provides contact information to submit complaints.

A preconstruction conference is required for all private developments with at least one acre of disturbance. The contractor is required to attend and discuss the erosion control and storm water management requirements for the project.

General contractors bidding on City of Fond du Lac projects are required to fill out a bidder's proof of responsibility which includes a section on familiarity with erosion control requirements. Contractors provide a list of training or workshops attended or other proof that they are aware of erosion control requirements and can properly install erosion control best management practices. Preconstruction meetings are required for municipal projects. Erosion control requirements are discussed.

Pollution Prevention

The city has developed storm water management best practice inspection logs to be used in evaluating municipal storm water management facilities.

All eighteen municipal storm water management facilities were inspected in the fall of 2012. The storm water management facilities include thirteen wet detention ponds, two dry detention ponds, two sumps/proprietary treatment devices and one rain garden. In addition four wet detention ponds owned by Fond du Lac County were inspected. The city storm sewer system discharges into these ponds.

Maintenance projects were completed at six storm water management facilities in 2012. Maintenance projects included repair of joint separation on outlet pipe, recoating steel discharge pipe, mowing and spraying to remove undesirable and invasive species, cleaning debris and silt fence from pond property, repair of emergency spillway, regrading and repair of pond inlet channels and regrading pond side slope.

Storm water pump station wet wells were inspected for sediment accumulation and were cleaned if necessary in March.

The city continued to conduct routine street sweeping in 2012.

The city conducted a fall leaf collection program. Composting and chopping up leaves was suggested as an alternative to leaf collection.

The city has developed SWPPPs for six municipal facilities. Most of the proposed best management practices have been completed including: installation of inlet protection, construction of parks division materials storage shed, construction of a sump in manhole at the municipal service center, connection of wash area at the municipal service center to the sanitary sewer, construction of a fueling area canopy, oil sock installations and snow storage area berm, buffer strip and grass swale installation.

One city staff member attended the Fox-Wolf Watershed Alliance Watershed Conference on April 17-18, 2012. The conference included many storm water related topics. Three city staff members watched a DNR webinar titled "Understanding Wisconsin's Phosphorus Rules: Phosphorus Discharge Limits" on March 27, 2012. One city staff member watched a DNR webinar titled "Overview of Changes to Non-Agricultural Performance Standards of Chapter NR 151" on March 28, 2012. Two city staff members attended the League of Wisconsin Municipalities Conference on October 17-19, 2012. The conference included a session on storm water management. Three city staff members attended the fall APWA conference on November 8-9, 2012. The conference included some sessions on storm water management.

The city has developed wellhead protection plans and adopted a wellhead protection ordinance on October 27, 2010.
