

Site Plan Requirements

The purpose of a site plan is to illustrate existing property conditions and provide details of new construction planned. The items listed below comprise a checklist of information to be shown on a site plan. The sample site plan demonstrates the level of detail required for an acceptable drawing.

1. Indicate property address, north arrow and scale.
2. Delineate property boundaries and dimensions.
 - Resource: Fond du Lac County GIS website can be used to obtain an overview of the property to assist you. <http://gisweb.fdlco.wi.gov/fonddulacs/>
3. Show all existing structures.
4. Show the location and indicate the size of the proposed construction. Indicate setback measurements to lot lines. Indicate the distance between existing and proposed buildings.
5. If an existing building (or part of an existing building) will be demolished to make way for a new garage and/or other accessory building, show the area of the existing construction to be removed.
6. Show location of overhead or underground power lines and underground gas lines.
7. Show the driveway to serve the garage, including any changes to widen or lengthen an existing driveway. If a new driveway is planned, or if a parking space will be constructed alongside the garage, show the limits of the new paved area.
8. Indicate the surface material of all existing and proposed driveway and parking areas. A concrete or asphalt surface is required.
9. Provide drainage details of the property. To determine the level of drainage information necessary, refer to drainage requirements included with this packet.

Revised 09.14.2020

Sample Fence Site Plan

Vision Triangle—Fence not to exceed 3' in height with 50% open face. The minimum vision triangle is 20' along each sidewalk from the inside corner and connecting the points to form a triangle. Anything in the triangle must meet the measurements previously mentioned.

Regulations per 720 of the Fond du Lac Zoning Code (see attached)

Fences can be installed up to the property lines

The City of Fond du Lac will not locate property lines.

It is the owner's responsibility to locate all property markers.

DIGGERS HOTLINE: 1-800-242-8511 or call 811

9) Fence, general requirements.

- a) The requirements of this section apply to all fencing, landscape walls and decorative posts equal to, or exceeding, 24 inches in height, for all land uses and activities.
- b) Materials and design. A fence should be constructed of material manufactured for such purpose such as naturally decay -resistant and/ or pressure treated wood, vinyl, galvanized and/ or coated chain link, or ornamental metal such as wrought iron. The use of scrap lumber, plywood/OSB, wood or plastic snow fence, chicken wire, plastic material less than 1" thick, wood pallets or other unapproved materials is prohibited.
- c) Construction. Support posts should be installed according to the manufacturer's instructions. In the absence of such instructions, the following will apply:
 - 1] Post height 4 feet to 5' 6" should be anchored to a depth not less than 30 inches.
 - 2] Post height more than 66" should be anchored to a depth not less than 40 inches.
- d) Orientation. The "finished" side of a solid fence should be installed to face an adjacent or abutting property, street or alley.
- e) Location. A fence may be placed up to a property line. No fence, or part thereof, may be sited in any wetland area, floodplain floodway, drainage way, regulated natural area, or other similar area.

10) Fence, Residential.

- a) Height, front yard: The maximum height of a fence, including all supporting posts and decorative elements, is 4 feet. The design of a fence within a required front yard should be at least 50% open.
- b) Height, side/rear yard: The maximum height of a fence, including all supporting posts and decorative elements, is 6 feet. Where a side yard and/or rear yard is adjacent to a nonresidential use or property zoned for a non- residential use, a fence height up to 10 feet is allowed.
- c) Height, street yard. The maximum height of a fence, including all supporting posts and decorative elements, is six feet, provided the fence does not extend beyond the rear wall of the primary structure, has a minimum right-of-way setback of six feet, and does not obstruct the vision clearance triangle between four feet and eight feet above the grade of the intersection of street centerlines.

FENCE – A structure providing enclosure or confinement or serving as a barrier, but not protecting against the elements (as distinguished from “building”).

FENCE, OPEN – A fence, including gates, which has, for each one-foot-wide segment extending over the entire length and height of the fence, 50% of the surface area in open spaces which afford a direct view through the fence.

FENCE, SOLID – A fence, including gates, constructed to screen an activity or land use.

LOT LINE, FRONT –The boundary of a lot which abuts a dedicated public or private street. Where a lot abuts two or more dedicated public or private streets, all lot lines facing a street shall be considered a front lot line. In the case of a land-locked lot, the front lot line shall be that lot line that faces the access to the lot.

LOT LINE, INTERIOR – A lot line which does not abut a street.

LOT LINE, REAR –That boundary of a lot which is opposite or most nearly parallel to the front lot line. In the case of an irregular or triangular shaped lot, the rear lot line is a line 10 feet in length within the lot lines, parallel to and at the maximum distance from the front lot line.

FENCE, SIDE – Any boundary of a lot which is not a front lot line or a rear lot line.
