# FortiClient Desktop VPN

1.) Launch the FortiClient App:

This can be done by double-clicking on the desktop icon:

Alternatively, you can search for "FortiClient" under your start menu:

Forticlient should open and display the message application below.

2.) Next click on "Remote Access" on the left-hand menu. You should see the screen below asking for your username and password. This is the same username and password that you log into your computer with.

After you enter this information, click on the "Connect" button.

3.) You will be presented with a request for a mobile token, which you will need to enter below.

*Your token number is accessed from the physical Fortitoken or the mobile token on your phone.

4.) Once connected the Foritclient app will disaper and you should be connected. If you would like to verify your connection, launch the FortiClient program and the should look like the screenshot below. You should see the bytes received/sent counting up slowly. When complete you you select disconnect.
