

FEEDBACK COLLECTED AT PIM MEETINGS

Lakeside Park PIM Notes

- Test concert for Lakeside Park West along the river
- Restaurant to N Main St not Oven Island – if it is where it is
- Multipurpose building – Oven Island – There will be a bridge for easy access and parking can be added
- MPB to Oven Island
- Remove 1 baseball diamond
- Fundraising effort public donations
- Market Park Resources – better signage
- Ice skating at Buttermilk to have sledding & ice skating
- Stake out the building onsite for people
- Very concerned before attending the meeting, now she is sold on the project
- Saputo property needs to be a catalyst for MPB? to LSP
- Need angled parking at restaurant
- No traffic on peninsula at all
- Additional parking along south parking area
- Change docks to day use as needed
- Doors to outside for restrooms
- Serving alcohol in the park
- 2-3 requests to stake out the MPB and parking lot.
- One guy wasn't opposed to development or MPB but the process seemed quick and pushed on the city from LSF.
- Question about ice shoves damaging boardwalk – my response was yes, that's possible. City crews would protect lighthouse and MPB as needed and like in the past.
- A couple questions about other docks being made public, which I said I wasn't aware of any more.
- A few questions were on how utilities would get to MPB location.
- A couple lease questions came up and some concerns with what happens if the restaurant fails.
- One suggestion was to condemn and buy the boat houses, tear them down and build MPB there.
- The Park Avenue bridge was thought to be load rated and wouldn't allow construction type vehicles, but I explained that it is standard load rated like most of our bridges.
- Will the transient boat slip users have to pay a fee for the day?
- A shortage of parking was mentioned by over half of the people I talked with and that includes folks in support of the MPB.
- Is ADA ramp needed for steps going down to water? Even if not required, will it be part of project anyway?
- A request was made for the transient docks to have slips for smaller boats. The yacht club has a dock across the big hole with large and small slips.
- A couple people said LSP West should be developed more.
- The proposed bridge between LSP and West was supported.

Other comments and feedback from attendees:

- MPB was called a restaurant by the majority; I pointed out the additional public spaces when able.
- A number of \$500k for City infrastructure was mentioned by at least one person, maybe two, and they said that was from City Manager.
- What is the timing of MPB construction if all goes forward? Per Dyann, a possible April 2021 start with a finish before summer of 2022.
- A small business owner (I believed she publishes magazines) was opposed and stated all the small businesses she talked to were also opposed. She plans to attend 3/10 Council meeting.
- Art and sculptures should be included around the MPB and walking paths and should be tasteful and reflective of the setting.

Future Lakeside Park Improvement Ideas

- Give first priority to local restaurants
- Stake out the building on site to see impact
- Public space in MPB should be rented through park – same as pavilion. Restaurant could still rent but same as public
- Rail on MPB should be brown to match soffit or lower rail, at least it would blend better in the park
- Amphitheater in west side on Hwy 45
- Please work on Lakeside Park West lots of potential
- Test concert at Lakeside Park West - Controlled entry and far from houses with lake view
- Trial concert in Lakeside Park West
- Summer concert series like Oshkosh has for Waterfest
- Naming rights for amphitheater
 - Agree!
- Are 3 ball diamonds necessary? Eastern or western diamond could be a future amphitheater site
- Exercise equipment
- Sculptures
- Agree with sculptures as long as public has input, maybe vote on a few designs
- Improve zoo area
- Build a wall to shelter the treatment plant and paint murals for beauty of FDL
- Ice skating in Buttermilk (Titledown has sledding & skating together)
- Agree – should have skating at Buttermilk also besides Lakeside Park
- No traffic on peninsula – limit traffic in park
- About time FDL moves forward!
